

## 2024

- Z. Kuang, Y. Xu, Q. Huang, J. Yang, C. El Kihal, H. Hu, Quantum computing with error mitigation for data-driven computational homogenization, *Composite Structures*, **Q1 (2024)**.
- S. Khalil, O. Elmhaia, B. Braikat, A. Hamdaoui, H. Hu, A. Boukamel, N. Damil, Investigation of FGM membrane wrinkling using reduced models based on a multi-scale method, *Thin-Walled Structures*, Volume 199, 111834, **Q1 (2024)**.
- M. Rammane, O. Elmhaia, S. Mesmoudi, O. Askourd, A. Tri, B. Braikat, N. Damil, A Hermite-type collocation mesh-free approach for simulating incompressible viscous fluid flows, *Mathematics and Computers in Simulation* Available online **Q1 (2024)**.
- Z. Bakhach, A.E. Kaimbillah, A. Hamdaoui, B. Braikat, F. Mohri, N. Damil, A dimensionless analytical analysis for buckling and lateral buckling interaction of thin-walled beams with open cross sections, *Thin-Walled Structures*, 195, 111396. **Q1 (2024)**.
- S. Kaba, L. Salhi, N. Damil, N. El Moçayd, A. Boukamel, A High-Order Implicit Algorithm Using an RBF-Type Meshless Method for the Simulation of Cardiac Electrical Activity, *Lecture Notes in Mechanical Engineering*, pp. 120–129. **Q4 (2024)**.
- A. Ouardi, A. Boukamel, N. Damil, A Microstructurally Motivated Hyperelastic Model for Elastomer Materials, *Lecture Notes in Mechanical Engineering*, pp. 92–98. **Q4 (2024)**.
- C. El Kihal, A. Hamdaoui, A., B. Braikat, N. Damil, Potier-Ferry, M. Modeling Elastoplastic Structures in Finite Transformation by a High-Order Algorithm, *Lecture Notes in Mechanical Engineering*, pp. 46–54. **Q4 (2024)**.
- M. Rammane, S. Mesmoudi, O. Askour, A. Tri, B. Braikat, N. Damil, Bifurcation Analysis of Incompressible Fluid Flow by a High Order Mesh-Free Indicator with Padé Approximants, *Lecture Notes in Mechanical Engineering*, pp. 101–110. **Q4 (2024)**.
- Z. Kuang, Y. Xu, Q. Huang, J. Yang, C. El Kihal, H. Hu, Quantum computing with error mitigation for data-driven computational mechanics, *Computer Methods in Applied Mechanics and Engineering*. **Q1 Soumis**.

## 2023

- Y. Xu, J. Yang, X. Bai, Q. Huang, N. Damil, H. Hu, Material database construction for data-driven computing via a continuous path-following method, *Composite Structures*, 319, 117187 **Q1 (2023)**.
- J. Yang, P. Li, Y. Zhang, Y. Hui, L. Xu, N. Damil, H. Hu, Unified functional based data-model-coupling computing for composite materials and structures, *Composite Structures*, 312, 116840. **Q1 (2023)**.
- M. Rammane, O. Elmhaia, S. Mesmoudi, O. Askour, B. Braikat, A. Tri, N. Damil, On the use of Hermit-type WLS approximation in a high order continuation method for buckling and wrinkling analysis of von-Kàrmàn plates, *Engineering Structures* 278, 115498 **Q1 (2023)**.

O. Elmhaia, Y. Belaasilia, O. Askour, B. Braikat, **N. Damil**, Numerical analysis of frictional contact between crack lips in the framework of Linear Elastic Fracture Mechanics by a mesh-free approach, *Theoretical and Applied Fracture Mechanics*, 103749. **Q1 (2023)**.

**A. Ouardi, A. Boukamel, N. Damil**, A model for hyperelastic rubber-like materials based on micro-mechanical elements. *European Journal of Mechanics - A/Solids. Volume 101*, 105036. **Q1 (2023)**.

M. Rammene, O. Elmhaia, S. Mesmoudi, O. Askour, B. Braikat, A. Tri, **N. Damil**, On the use of Hermit-type WLS approximation in a high order continuation method for buckling and wrinkling analysis of von-Kàrmàn plates, *Engineering Structures* 278, 115498. **Q1 (2023)**.

O. Elmhaia, Y. Belaasilia, O. Askour, B. Braikat, **N. Damil**. Numerical analysis of frictional contact between crack lips in the framework of Linear Elastic Fracture Mechanics by a mesh-free approach, *Theoretical and Applied Fracture Mechanics*, 103749. **Q1 (2023)**.

Y. Jie, L. Ping, Z. Yi, H. Yanchuan, X. Lihua, **Damil N.**, H. Heng May, Unified functional based data-model-coupling computing for composite materials and structures, *Composite Structures. Volume 31215*, 116840. **Q1 (2023)**.

Y. Xu, J. Yang, X. Bai, Q. Huang, **N. Damil**, H. Hu, Material database construction for data-driven computing via a continuous path-following method, *Composite Structures. Volume 319, 1*, 117187. **Q1 (2023)**.
